derivative and how
do derivatives work
June 7th, 2020 -
the term derivative
refers to a
financial product
that derives its
value from its
relationship to
another underlying
asset these assets
typically are debt
or equity
securities modities
indices or

currencies but
derivatives can
assume value from
nearly any
underlying asset'

'option finance
June 7th, 2020 - in
finance an option
is a contract which
gives the buyer the
owner or holder of
the option the
right but not the
obligation to buy
or sell an
underlying asset or
instrument at a
specified strike
price prior to or
on a specified date
depending on the
form of the option
the strike price
may be set by
reference to the
spot price market

price of the
underlying security
or commodity on the'
